## PROFILE

My career was kickstarted by the webagency SPiNNWERK, where I had the opportunity to work for clients like Unilever (and brands like Knorr, Magnum, Eskimo, and Lagnese), Schirrhofer and Bresso.

As the lead fullstack web developer at Greenpeace CEE, I have touched everything in the infrastructure. From the website to the donation form as well as the infrastructure, I have upgraded it all.

In 2019 my career was taken to the next level by taking a senior position in the DU Digital Agency. Quickly I became the lead developer for three of our main projects. Therefore I have become once again the backbone of the company.

## EXPERIENCE
